List of Figures	ix
List of Tables	xiii
Preface	xvii
1 Understanding the Information Age	1
1.1 Faster, Better, Cheaper	1
1.2 Economic Impact of Information Technology	9
2 Aggregate Growth Accounting	17
2.1 The Role of Information Technology	17
2.2 The American Growth Resurgence	32
2.3 Demise of Traditional Growth Accounting	49
3 Information Technology and Growth in the G7 Countries	59
3.1 Introduction	59
3.2 Investment and Total Factor Productivity	61
3.3 Investment in Information Technology	69
3.4 Alternative Approaches	81
3.5 Conclusions	84
4 The Changing Structure of Output and Intermediate Inputs	87
4.1 Introduction	87
4.2 Methodology	90
4.3 Data and Adjustments	107
4.4 Data Issues and Comparisons	114
4.5 Estimates of Output and Intermediate Input by Industry	118
4.6 Conclusions	138

5 Capital Services and Information Technology	147
5.1 Introduction	147
5.2 Methodology	149
5.3 Data	165
5.4 Results	171
5.5 Conclusions	199
6 Labor Input and the Returns to Education	201
6.1 Introduction	201
6.2 Methodology	203
6.3 Data and Implementation	217
6.4 Aggregate Labor Input	227
6.5 Labor Input at the Industry Level	247
6.6 Conclusions	271
7 Productivity Growth for U.S. Industries	291
7.1 Introduction	291
7.2 Measuring Industry Productivity	293
7.3 Productivity Results	299
7.4 Conclusions	357
8 The Industry Origins of the American Growth Resurgence	361
8.1 Introduction	361
8.2 Methodology	363
8.3 Empirical Results	379
8.4 Conclusions	413
9 Economics on Internet Time	417
References	421
Index	437

List of Figures

1.1	Relative prices of computers and semiconductors, 1959–2002	3
1.2	Relative prices of computers, communications, and software, 1948–2002	6
1.3	Relative prices of computers, central office switching equipment, and prepackaged software, 1959–2002	7
2.1	Output shares of information technology by type, 1948–2002	23
2.2	Input shares of information technology by type, 1948–2002	31
2.3	Output contribution of information technology	41
2.4	Output contribution of information technology by type	41
2.5	Capital input contribution of information technology	42
2.6	Capital input contribution of information technology by type	43
2.7	Contributions of information technology to total factor productivity growth	45
2.8	Sources of gross domestic product growth	46
2.9	Sources of average labor productivity growth	48
3.1	Capital input contribution by country	75
3.2	Sources of total factor productivity growth by country	77
3.3	Sources of economic growth by country	78
3.4	Sources of labor productivity growth by country	80

4.1a	Input-output USE table	100
4.1b	Input-output MAKE table	100
4.2a	Communications equipment prices; BLS vs. BEA	112
4.2b	Computer services prices; BLS vs. BEA	113
4.3	Growth rate of industry price relative to GDP deflator, 1977–2000	125
4.4	IT intermediate input cost share of output, 2000	132
4.5	Growth of value-added, 1977–2000	136
4.6	Growth rate of value-added vs. intermediates, 1977–2000	137
5.1	Average price change, 1977–2000	176
5.2	Growth in capital services, 1977–2000	180
5.3	Change in growth of capital services, 1995–2000 less 1977–1995	185
5.4	Growth in IT capital services, 1977–2000	188
5.5	Change in growth of IT capital services, 1995–2000 less 1977–1995	191
5.6	IT capital share, 1995	194
6.1	Aggregate labor input, employment and hours	229
6.2	Aggregate quality and first order approximation, $Q(s)*Q(c)*Q(a)*Q(e)$	230
6.3	First-order quality indices	232
6.4	Labor volume (all worker characteristics) vs. education alone	235
6.5	Distribution of education attainment of work force	235
6.6	Compensation by education attainment (relative to those with high school diploma)	236
6.7	Distribution of education attainment of workers aged 25–34	237
6.8	Age composition of the work force	238
6.9	Compensation by age relative to 25–34-year-olds	239
6.10	Female share of the work force, hours and wage differentials	241
6.11	Changing male work force participation rates by age	244
6.12	Changing female work force participation rates by age	244
6.13	Comparison of labor quality estimates (1996 = 1)	246

List of Figures	xi
6.14 Percentage of workers college educated in 2000	251
6.15 Compensation (\$/hour) in 2000	252
6.16 Percentage of total hours; aged 16–35 in 2000	253
6.17 Percentage of total hours; females in 2000	255
6.18 Growth in labor input, 1977–2000	258
6.19 Growth in college labor input, 1977–2000	263
6.20 Growth in non-college labor input, 1977–2000	264
6.21 Change in labor input growth, 1995–2000 less 1977–1995	265
6.22 Growth in labor quality, 1977–2000	269
6.23 Change in labor quality growth, 1995–2000 less 1977–1995	270
7.1 Output growth, 1977–2000	303
7.2 Change in output growth, 1995–2000 less 1977–1995	304
7.3 Intermediate materials contribution, 1977–2000	306
7.4 Capital contribution, 1977–2000	307
7.5 Labor contribution, 1977–2000	309
7.6 Total factor productivity growth, 1977–2000	310
7.7 Change in capital quality contribution, 1995–2000 less 1977–1995	314
7.8 Change in capital stock contribution, 1995–2000 less 1977–1995	316
7.9 Change in labor quality contribution, 1995–2000 less 1977–1995	317
7.10 Change in hours contribution, 1995–2000 less 1977–1995	318
7.11 IT capital contribution, 1977–2000	326
7.12 College labor contribution, 1977–2000	327
7.13 Change in IT capital contribution, 1995–2000 less 1977–1995	333
7.14 Change in college-educated labor contribution, 1995–2000 less 1977–1995	335
7.15 Change in total factor productivity growth, 1995–2000 less 1977–1995	338
7.16 TFP growth by sub-period, IT hardware producers vs. others	339
7.17 Labor productivity growth, 1977–2000	347

7.18	Change in labor productivity growth, 1995–2000 less 1977–1995	349
8.1	Industry contributions to aggregate value-added growth, 1977–2000	394
8.2	Change in industry contributions to aggregate value-added growth, 1995–2000 less 1977–1995	396
8.3	Industry contributions to aggregate TFP growth, 1977–2000	397
8.4	Change in industry contributions to aggregate TFP growth, 1995–2000 less 1977–1995	398
8.5	Industry contributions to aggregate capital input, 1977–2000	402
8.6	Industry contributions to aggregate IT capital input, 1977–2000	403
8.7	Industry contributions to aggregate non-IT capital input, 1977–2000	404
8.8	Industry contributions to aggregate labor input, 1977–2000	405
8.9	Industry contributions to aggregate college labor input, 1977–2000	407
8.10	Industry contributions to aggregate non-college labor input, 1977–2000	408
8.11	Change in industry contributions to aggregate IT capital, 1995–2000 less 1977–1995	409
8.12	Change in industry contributions to aggregate non-IT capital, 1995–2000 less 1977–1995	410
8.13	Change in industry contributions to aggregate college labor, 1995–2000 less 1977–1995	411
8.14	Change in industry contributions to aggregate non-college labor, 1995–2000 less 1977–1995	412

List of Tables

2.1	Information technology output and gross domestic product	19
2.2	Growth rates of outputs and inputs	22
2.3	Information technology capital stock and domestic tangible assets	25
2.4	Information technology capital services and gross domestic income	28
2.5	Labor services	33
2.6	Sources of gross domestic product growth	38
2.7	Sources of average labor productivity growth	39
2.8	Sources of total factor productivity growth	44
3.1	Levels of output and input per capita and total factor productivity	63
3.2	Growth rate and level of output	64
3.3	Growth rate and level of population	65
3.4	Growth in output and input per capita and total factor productivity	65
3.5	Levels of capital input and capital stock per capita and capital quality	67
3.6	Levels of IT capital input and IT capital stock per capita and IT capital quality	70
3.7	Levels of non-IT capital input and capital stock per capita and non-IT capital quality	71
3.8	Growth in capital input and capital stock per capita and capital quality	71

3.9	Growth in IT capital input and capital stock per capita and IT capital quality	72
3.10	Growth in non-IT capital input and capital stock per capita and non-IT capital quality	73
3.11	Levels of labor input and hours worked per capita and labor quality	73
3.12	Growth in labor input and hours worked per capita and labor quality	74
3.13	Contributions of total capital, IT capital and non-IT capital to output growth	74
3.14	Contributions of total factor productivity from IT and non-IT production to output growth	76
3.15	Sources of output growth	77
3.16	Sources of labor productivity growth	79
4.1	Industry classification and characteristics in 2000 (billion \$)	91
4.2	Industry classification by IT-intensity	93
4.3	3-sector U.S. input-output table, 2000 (billion \$)	102
4.4	Comparisons of output growth (1987–2000) from various data sources	116
4.5	Export and import share of commodity output in 2000	121
4.6	Growth in output, inputs, and prices, 1977–2000	122
4.7	Growth of industry output by sub-period	128
4.8	IT and non-IT intermediate inputs	130
4.9	Growth of intermediate input and value-added by sub-period	134
A4.1	Assignment of BLS IO categories to our 44 industries	141
A4.2	Growth of exports, imports and import prices, 1977–2000	145
5.1	Depreciation, inflation and investment by asset type and class	172
5.2	Values of investment, capital stock, and capital service flows, 2000	177
5.3	Growth rates of capital services, stock, and quality, 1977–2000	178
5.4	Growth rates of capital services	181

List of Tables	xv
5.5 Growth rates of capital stock	182
5.6 Growth rates of capital quality	183
5.7 Growth rates of total, IT, and non-IT capital services, 1977–2000	186
5.8 Growth rates of IT and non-IT capital services, by sub-period	189
5.9 IT capital share of total capital input	192
5.10 Industry classification by IT-intensity	196
5.11 Aggregate capital	198
5.12 Growth of aggregate capital input, stock and quality	199
6.1 Classification of civilian labor force for each industry	204
6.2 Industry classification and characteristics in 2000	205
6.3 Industry groups for annual marginal matrices from CPS	221
6.4 Labor input of U.S. aggregate economy	228
6.5 Growth rates of aggregate labor input, quality and hours	230
6.6 Decomposition of quality index of aggregate labor	233
6.7 Labor input of U.S. private economy	243
6.8 Labor characteristics by industry, 2000	248
6.9 Growth of labor input by industry	256
6.10 Growth of college-educated labor by industry	259
6.11 Growth of non-college-educated labor by industry	260
6.12 Growth in labor quality by industry	267
A6.1 Indices of labor input	274
A6.2 Decomposition of labor quality	278
A6.3 Educational attainment of U.S. workforce	282
A6.4 Educational attainment of those aged 25–34 in workforce	283
A6.5 Age distribution of the workforce	284
A6.6 Relative labor cost by age (relative to 25–34-year-olds)	285
A6.7 Gender composition, wage and hours differential; employment class	286

7.1	Contributions to output growth, 1977–2000	301
7.2	Contributions to output growth, 1977–2000	312
7.3	Contributions to output growth, 1977–2000	320
7.4	Contributions to output growth, 1977–1995	322
7.5	Contributions to output growth, 1995–2000	324
7.6	IT and non-IT capital contributions to output growth	328
7.7	College-educated and non-college-educated labor contributions to output growth	330
7.8	Total factor productivity growth, by sub-period	336
7.9	Contributions to labor productivity, 1977–2000	341
7.10	Contributions to labor productivity, 1977–1995	343
7.11	Contributions to labor productivity, 1995–2000	345
7.12	Productivity by IT classification	352
7.13	Comparison of data and methods for TFP estimation	355
8.1	Growth in aggregate value-added and the sources of growth	380
8.2	Growth and shares of aggregate variables	381
8.3	Decomposition of aggregate labor productivity	384
8.4	Aggregate reallocation effects	386
8.5	Industry decomposition of labor productivity growth	388
8.6	Industry contributions to aggregate value-added and TFP growth, 1977–2000	392
8.7	Industry contributions to aggregate capital and labor input growth, 1977–2000	400
