Preface	xiii
About the Authors	xxxi
Biography	xxxv
List of Publications	Xxxvii
Ph.D. Thesis Advisees	Ivii
1 Research on the Cost of Capital: Past, Present, and Future	1
<i>Lawrence J. Lau</i>	
1.1 Introduction	1
1.2 Historical Origin of the "Cost of Capital"	4
1.3 The Quest-The Econometric Modeling of Intertemporal General Equilibrium	5
1.4 The First Decade (1963-1973)	13
1.5 The Second Decade (1973-1983)	19
1.6 The Third Decade (1983-1993)	24
1.7 Future Research Opportunities	29
1.8 Concluding Remarks	32
2 The International Consequences of the Leading Consumption Tax Proposals	35
<i>Robert E. Hall</i>	
2.1 Introduction	35
2.2 Taxes Considered	35
2.3 Basic Effects	37
2.4 Nominal Prices and Price Measurement	40
2.5 Effects of the Anticipation of Tax Reform	43
2.6 Interaction of the U.S. Economy and the Rest of the World	45
3 The Cost of Capital and Regulation	47
<i>Laurits R. Christensen</i>	
3.1 Introduction	47

3.2	Capital Costs for Unregulated and Regulated Firms	48
3.3	The Legacy of Improperly Measured Capital Costs for Regulated Electric Utilities in the United States	50
3.4	Incentive Regulation for U.S. Electric Utilities Based on the True Cost of Capital	51
3.5	Concluding Remarks	54
4	The Cost of Capital, Q, and the Theory of Investment Demand	55
	<i>Fumio Hayashi</i>	
4.1	Introduction	55
4.2	The Cost of Capital	57
4.3	Detour: Corporate Taxes	60
4.4	Models with Strictly Convex Adjustment Costs	61
4.5	Multiple Capital Goods	67
4.6	Uncertainty	69
4.7	Irreversibility	71
4.8	Capital Structure	78
4.9	Conclusion	81
	Appendix	81
5	The Cost of Capital and the Measurement of Productivity	85
	<i>Frank M. Gollop</i>	
5.1	Input Quality	87
5.2	Welfare versus Productivity Growth	91
5.3	Input Growth and Productivity Bias	97
5.4	Conclusion	105
6	The Jorgenson System of National Accounting	ill
	<i>Barbara M. Fraumeni</i>	
6.1	Introduction	
6.2	National Accounting Systems	112
6.3	Definitional Tables	114
6.4	Human Capital and Nonmarket Accounts	124
6.5	Conclusion	141
7	Does Infrastructure Investment Increase the Productivity of Manufacturing Industry in the U.S.?	143
	<i>Charles R. Hulten and Robert M. Schwab</i>	
7.1	Introduction	143
7.2	Testing the Alternative Models	144
7.3	Data	147

Contents	Vii
7.4 Econometric Results	151
7.5 Summary and Conclusions	158
8 The Cost of Capital and Consumer Behavior	165
<i>Thomas M. Stoker</i>	
8.1 Introduction	165
8.2 Modeling Demands with Flexible Functional Forms	168
8.3 Aggregate Demand and Heterogeneous Households	175
8.4 Related Innovations to Econometric Methods	183
8.5 A Closing Note	184
9 Innovations in Applied Welfare Economics	187
<i>Daniel T. Slesnick</i>	
9.1 Introduction	187
9.2 Welfare Economics at the Individual Level	188
9.3 Applications: The Measurement of Individual Welfare	197
9.4 Welfare Economics at the Aggregate Level	202
9.5 Applications: The Measurement of Social Welfare	211
9.6 Conclusions	222
10 The Cost of Capital and Intertemporal General Equilibrium Modeling of Tax Policy Effects	227
<i>Kun-Young Yun</i>	
10.1 Introduction	227
10.2 The Cost of Capital	229
10.3 Intertemporal General Equilibrium Model	237
10.4 Welfare Analysis of Tax Policy	255
10.5 Concluding Remarks	268
11 Progress in Measuring the Price and Quantity of Capital	273
<i>W Erwin Diewert and Denis A. Lawrence</i>	
11.1 Introduction	273
11.2 The Relationship between Asset Prices, Depreciation, and Rental Prices	275
11.3 The Declining Balance Depreciation Model	277
11.4 The Gross Capital Stock Model	279
11.5 The Straight Line Depreciation Model	280
11.6 Construction of the Alternative Reproducible Capital Stocks for Canada	283

11.7	Alternative Productivity Measures for Canada Using Declining Balance Depreciation	287
11.8	Alternative Productivity Measures for Canada Using Straight Line Depreciation	296
11.9	Alternative Productivity Measures for Canada Using One Hoss Shay Depreciation	301
11.10	Conclusion	307
	Data Appendix	309
12	Modeling Trade Policies and U.S. Growth: Some Methodological Issues	327
	<i>Mun S. Ho</i>	
12.1	Introduction	327
12.2	Issues in Numerical Dynamic Models	328
12.3	The Structure of the Model	338
12.4	Effects of Trade Barriers	345
12.5	Conclusion	362
	Appendix	363
A.1	Household Sector	363
A.2	Producer Sector	366
A.3	Cost of Capital and Investor Behavior	368
A.4	Government	369
A.5	Rest-of-the-World	370
A.6	The Markets and Equilibrium Conditions	372
A.7	Solution of Model and Exogenous Variables	374
A.8	Data and Parameters	376
13	The Cost of Capital and the Economics of the Environment	379
	<i>Peter J. Wilcoxon</i>	
13.1	Introduction	379
13.2	The Econometric Approach	381
13.3	An Econometric General Equilibrium Model	385
13.4	Foreign Trade	390
13.5	Estimating the Effects of Environmental Regulation	392
13.6	Confidence Intervals	396
13.7	Conclusion	402
	References	407
	Index	443
